

Watcharapon Weeraborirak

AI Engineer & Data Engineer

ABOUT ME

Hi there! I'm an AI Engineer and Full-Stack Developer from Bangkok, Thailand.

With a Bachelor's degree in Computer Engineering from Southeast Asia University, I've built a strong foundation in AWS services and tech development.

EDUCATION

2020

Bachelor's degree

Southeast Asia University (SAU)

Education: Bachelor's degree 4 years

Major: Computer Engineering (IoT)

GPA: (GPA) 3.21

EXPERTISE

-  Python
-  Design Architecture
-  Project management
-  Critical thinking
-  Problem solving

LANGUAGE

Thai

English (intermediate level)

EXPERIENCE

2022 - 2024

Thaicom public company limited

349 SJ Infinite 1 Business Complex, 28th Floor Vibhavadi Rangsit Rd, Chatuchak, Chatuchak, Bangkok 10900 & LLK Mother center

AI Engineer at Thaicom

- At Thaicom, I embraced the challenge of transitioning from a Full-Stack Developer to an AI Engineer. This role allowed me to leverage my extensive experience in geospatial data management and deploy it with cutting-edge AI technologies, all powered by AWS CloudFormation. Here are the key aspects of my role and achievements:
- AI and Data Model Deployment I deployed several critical models, such as disaster models (for droughts and floods) using AWS CloudFormation and CDK for infrastructure management by implementing serverless deployments using AWS Lambda, SageMaker, and ECS Additionally, Managed ETL processes using Glue Jobs and PySpark, handling data preprocessing and postprocessing efficiently.
- I primarily focused on serverless solutions but also deployed geospatial tools on AWS ECS when necessary. I handled large data preprocessing before inserting it into databases and implemented API Gateway with Lambda or Lambda@Edge to manage and access the data effectively.

2020 - 2022

Mango Consultant Co.,Ltd

555 Rasa Tower 1, Unit 2304-1, 23rd Floor, Phaholyothin Rd, Chatuchak, Chatuchak, Bangkok 10900

AI Developer

Contributed to the development of a CRM Chatbot platform for collecting and analyzing customer feedback from platforms like Facebook and LINE. Implemented KNN models for customer segmentation and Naive Bayes for spam detection.

- Collaborated on a Face Recognition System using CMake and DLIB for worker
- identification through image processing.
- Designed a microservice architecture for a LINE Developer system, enabling users to
- request quotations (PO) using the LINE Messaging API.
- Developed an RPA system for marketing, streamlining processes by retrieving and
- processing data from a database with 100,000 records stored in the DBD Data

GENERAL INFORMATION

2020

Interested position

Software Engineer, AI Specialist,
Full Stack Developer, Backend
Developer

SKILLS

ACHIEVEMENTS HISTORY

AUGUST 2022 TO NOVEMBER 2023

- BSI Training Academy Issued by Udosak Suntithikavong
- AWS Security Engineering on AWS
- AWS Developing on AWS
- AWS Technical Essential Issued by Amazon Web Services
- AWS Cloud Practitioner Essentials Day by Amazon Web Services
- Voxy Proficiency Achievement Certificate – Intermediate Issued Voxy

FEBRUARY 2020 TO FEBRUARY 2020

- National Research Office Inventor's Day 2020,
- Participated in presenting research results

MARCH 2020 TO MARCH 2020

- Institute President of Southeast Asia University,
- SAU English Test Course.

AUGUST 2019 TO MARCH 2020

- National Science and Technology Agency,
- Great Commission of the 19th Information Technology Contest of Thailand

MARCH 2019 TO MARCH 2019

- Institute of National Electronics and Computer Technology Center (NECTEC)

PORTFOLIOS / HONORS / REFERENCES

IoT Automated Brine Monitoring and Control

- Competition project of the exhibition contest information
- technology of the 19 (The NSC) have a certificate through the
- finals.
- BITEC contest, National Research Office participated in
- research Innovative invention received a certificate
- Details can be found at <https://iot.sau.ac.th/project 2020>
